

Engine Mount Notes:

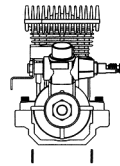

The engine mount furnished will accommodate the Thunder Tiger 46H, the Thunder Tiger 50H, and the other Heli engines. If you are installing a Thunder Tiger engine, you will find the mount is wider than the engine crankcase. Two spacers are furnished to accurately locate the engine while bolting it in place. Remove these spacers after installation.

Step1
Install the engine and
spacers into the engine
mount.

Step2
Install the 4 mount
screws and make sure
the screws are tighten
firmly.

Step3
Remove the spacers.
